Note: A major repair or alteration may require a signed Form 337 for return to service. This document will only serve as an inspection record when a Form 337 is required for return to service. It will not constitute a release to service or supersede the requirement for a completed FAA Form 337.

The above identified aircraft system or appliance was repaired in accordance with the current FAR's; manufacturer approved repair / overhaul data, and this repair station's Repair Stations and Quality Control Manuals as accepted by the FAA. It is the responsibility of the persons or agency installing the above appliance or operating this aircraft to ensure its airworthiness at time installation.
