2 Introduction

Alta Avionics, LLC is an avionics repair facility providing maintenance, repair, and installation of avionics systems for various types of aircraft.

This Forms Manual has been prepared in accordance with the current Code of Federal Regulations (CFR's), and the policies of Alta Avionics, LLC.

This manual contains the forms used by Alta Avionics, LLC, examples, and their method of completion, to comply with 14 CFR Part 145.

Each supervisor, inspector, and all personnel working for Alta Avionics, LLC will have access to this manual. The most current version will be supplied through a desktop icon named "KAI Manuals" on all computer terminals supplied by Alta Avionics, LLC. All personnel are required to thoroughly understand its contents.

This Forms Manual is accepted by the FAA, and will be maintained in a current status at all times.

3 Manual Control

This manual will be stored on Alta Avionics main computer server. Alta Avionics, LLC will supply a direct link, 'KAI Manuals', on every computer terminal for manual access to all employees. A computer system data backup will be performed once each month, with rolling data 'snapshots' each day, and that data will be used to restore repair station data in the event of computer failure. Each employee will be trained on the procedure to access all the manuals at the time of hiring.

The General Manager will be notified by a department supervisor in the event this manual is not current, and valid for that department's use, and will identify needed changes using form KA-10 (Manual Change Request). A sample of this form is found in the Forms Manual. The General Manager will have the revisions found necessary, produced in a final form. The proposed revisions will be submitted to the FAA/CHDO (Certificate Holding District Office) in electronic format (PDF) for acceptance. The FAA Coordinator will revise manuals as required, and explain the revisions to all employees. An entry into each employee's training record will be added after each employee has been trained to verify and acknowledge the understating of each revision. Upon approval by an authorized Repair Station representative, the repair station will commence operating within the guidelines of the new revision. The "List of Effective Pages" will reflect the Approval/Acceptance of the current revision. A file will be maintained, showing on a continuous basis, the disposition of each manual change. The FAA/CHDO will be notified each time a revision to this manual is needed. Revised areas will be identified by a vertical bar in the margin.

Revisions found "un-acceptable" to the FAA/CHDO, which do not conform to applicable regulations, will be addressed by this repair station as a top priority. The identified procedure or action will cease, and acceptable changes implemented immediately. The maintenance/administrative actions that were performed under revisions found "unacceptable" by the FAA/CHDO will be addressed in the following order:

Safety of Flight: Aircraft operator to be notified immediately, and advised that aircraft is to remain on the ground until this repair station can correct the problem, or coordinate with another certified repair station to correct the problem.

Procedure/Record Keeping: Aircraft operator to be notified immediately, and advised of the problem. The operator will have the option to operate the aircraft until the problem can be corrected.

Problems that do not affect aircraft and/or appliances will be dealt with internally and - immediately to correct them.

3.1 Satellite Facilities

All satellite facilities under Alta Avionics, LLC will also be supplied with a direct link on every computer terminal. Each employee will be trained on the procedure to access all the manuals during their initial training. A stored copy will be supplied to each facility in case of computer failure.

4 Record of Revision – Forms Manual

Revision Identification	Revision Date	Description of Revision	Repair Station Approval
1.0	4/2020	Initial Version Complete	See 'List of Effective Pages'

5 General Description

5.1 Form AA-ACT (Airspeed Calibration Test)

This form is used when calibrating Airspeed Indicators or similar appliances. The completed form will be scanned into the appropriate records and/or the workorder.

5.2 Form AA-AT (Autopilot Test)

This form is used when testing the operation of an installed autopilot system. The completed form will be scanned into the appropriate records and/or the workorder.

5.3 Form AA-ATC-TMSI (ATC Transponder and Mode S Inspection)

This form is used when testing and inspecting the operation of a Transponder appliance. The completed form will be scanned into the appropriate records and/or the workorder.

5.4 Form AA-ATCC (Aircraft Task Completion Checklist)

This is a checklist used in conjunction with return to service inspections of aircraft. It will be completed and initialed by the technician and authorized inspector, dated. Upon completion, the form will be scanned into the appropriate work order.

5.5 Form AA-ATI (Altimeter Test/Inspection)

This form is used when Testing/Inspecting the condition and operation of an Altimeter as per 14 CFR Part 43, Appendix E. The completed form will be scanned into the appropriate records and/or the workorder.

5.6 Form AA-AUD-AFCA (Audit Findings/Corrective Action)

This form is used to document findings and corrective actions for audits. Upon completion, forms are to be electronically filed with appropriate audit in Alta Avionics, LLC computer system.

5.7 Form AA-AUD-AFCL (Audit Findings Control Log)

This form is used to keep a tally of Audit Findings which are the result of an audit. Upon completion, forms are to be electronically filed with appropriate audit in Alta Avionics, LLC computer system.

5.8 Form AA-AUD-AR (Audit Request)

This form is used to request a new vendor, current vendor, or internal audit.

5.9 Form AA-AUD-CVA (Calibration Vendor Audit)

This form is used to audit and evaluate test equipment/tool calibration facilities. Upon completion, forms are to be electronically filed with appropriate audit in Alta Avionics, LLC computer system.

5.10 Form AA-AUD-IA (Internal Audit)

This form is used for the internal audit function of the different departments and/or areas within the company. Upon proper completion, forms are to be electronically stored in Alta Avionics, LLC computer system.

5.11 Form AA-AUD-VA (Vendor Audit)

This form is used for vendor audit and evaluation. Upon completion and approval of this form, a vendor may be placed on the Approved Vendor List, and electronically filed with vendor audits in Alta Avionics, LLC computer system.

5.12 Form AA-CC (Certificate of Calibration)

This form is used to document the calibration of instruments/appliances that are calibrated under standards that are based on NIST standards or derived. The completed form will be scanned into the appropriate records and/or the work order.

5.13 Form AA-CLEF (Capabilities List Self-Evaluation Form)

This form will be used to evaluate the proposed repair station that is requesting an added capability to the Ops Specs' limited rating.

5.14 Form AA-Compass Swing Documentation Sheet

This form is used to document the data found while doing a compass swing. The completed form will be scanned into the appropriate records and/or the work order.

5.15 Form AA-ECTCR (Electromagnetic Compatibility Test Completion Record)

This form is used when conducting DO-160 testing of components. The technician will complete and sign the form upon completion of testing.. Completed forms will be scanned in appropriate work order.

5.16 Form AA-ETR (Employee Training Record)

This form is used to document ongoing and recurrent training of all employees of Alta Avionics LLC. Completed forms will be scanned into the appropriate employee training records.

5.17 Form AA-IIC (Installation Inspection Checklist)

This checklist is used during aircraft installations. The technician will use this as a checklist during the installation, and to document inspections. It will be signed upon completion and scanned into the appropriate work order.

5.18 Form AA-LE-ACMR (Log Entry – Air Carrier Maintenance Release)

This form is used for Air Carrier logbook entries upon the aircraft being released back into service. The technician will document the applicable information when completing tests/inspections per 14 CFR Parts 91.411, 91.413, 91.217, and it will be signed by an authorized inspector. This sticker is to be placed in aircraft logbook, and electronically stored.

5.19 Form AA-LE-ATI (Log Entry – Altimeter Test and Inspection)

This sticker is used as a Log Entry for Altimeter tests and inspections. The technician will document the applicable information when completing tests/inspections per 14 CFR Parts 91.411, 91.413, 91.217, and it will be signed by an authorized inspector. This sticker is to be placed in aircraft logbook, and electronically stored.

5.20 Form AA-LE-GAMR (Log Entry – General Aviation Maintenance Release)

This form is used for General Aviation logbook entries upon the aircraft being released back into service. The technician will document the applicable information when completing tests/inspections per 14 CFR Parts 91.411, 91.413, 91.217, and it will be signed by an authorized inspector. This sticker is to be placed in aircraft logbook, and electronically stored.

5.21 Form AA-MACS (Master Altimeter Correction Sheet)

This form is used when calibrating pitot/static test equipment and/or altimeters. The technician will document the results of the calibration and/or test, and sign. The completed form will be scanned into the appropriate records and/or the work order.

5.22 Form AA-MCR (Manual Change Request)

This form is used to request a change any of Alta Avionics, LLC manuals. This form will be completed and given to the General Manager. The manuals may be revised if deemed necessary.

5.23 Form AA-RT (Radar Test)

This form may be used at the discretion of the Service Department Supervisor. When using this document, the technician will document the results of the test and sign. The completed form will be scanned into the appropriate records and/or the e work order.

5.24 Form AA-RTL (Required Training Log)

This form is used to document required training for employees. This form will be completed and maintained by the employee's supervisor, showing the type, date, and who trained the employee. This form will be scanned in Alta Avionics', Inc. computer system under the employee's Training Records.

5.25 Form AA-SPL (Scrapped Parts Log)

This form is used to document scrapped parts. This form will be completed and signed by an authorized inspector. The Chief Inspector, or his/her designee, will verify by signature. The form will be kept on file for not less than two years.

5.26 Form AA-TECIF (Test Equipment Calibration and Inspection Form)

This form is used for inhouse equipment calibration. This form will be completed by the technician performing the calibration of the equipment, and will be signed by an inspector. The completed form will be scanned into the appropriate records and/or the work order.

5.27 Form AA-VSICC (Vertical Speed Indicator Correction Card)

This form is used when testing the accuracy of a vertical speed indicator. The technician will document the results and sign the form upon completion of testing. Upon completion, the form will be scanned into the appropriate work order.

5.28 Form AA-WBELR (Weight/Balance & Equipment List Revision)

This form is used to amend the aircraft's weight and balance, and equipment list. The technician will complete this form when the weight and balance has changed, or new equipment has been installed. An authorized inspector will sign and place into the Airplane Flight Manual. The completed form will be stored and/or scanned into the appropriate records and/or the work order.

5.29 Form AA-WO (Work Order)

This repair station will utilize a company work order, identified by a number, containing the customer's name, date, and appropriate identification required to identify any part, unit, or aircraft. This work order will list all work on the front that is to be accomplished, in sufficient detail, that it will be readily understandable to the workman. The work order will contain all pertinent documentation pertaining to the repair items listed on the front of the work order. The completed work order will be stored in Alta Avionics, LLC computer system.

5.30 Form AA-WT – (Work Traveler)

This form is used for documenting pertinent information such as: Work order number, customer information, description of aircraft or appliance, customer complaint, parts history, repair description, inspection record, type of repair, repair technician, and authorized inspector signature with Return to Service determination. The work traveler will be used by the technician accomplishing the work. The technician will ensure that all applicable information is completed. Both technician and authorized inspector will sign the work traveler when complete. The technician and inspector can be the same person if authorized in the Roster of Repair Station Personnel. The authorized inspector will determine if the item is approved for Return to Service. Each completed work traveler will be stored in Alta Avionics, LLC. computer system.

5.31 Label AA-CS (Calibration Sticker)

This sticker is used for “in-house” equipment calibration. When the calibration is completed, this sticker will be completed by the technician, and placed on the equipment.

5.32 Label AA-ML (Manual Label)

This label is used on technical manuals to show their status. The technician will check to see if manual is current, reference only, or static, and document current status on the label with initials and date.

5.33 Label AA-TS (Tested Sticker)

This sticker is used for altimeter tests. When an altimeter has been tested per 14 CFR Part 43, Appendix E. The technician will complete, and place the sticker on the altimeter.

5.34 Tag Airworthiness Approval Tag FAA Form 8130-3

This form will be attached to repaired and/or tested units that are found to be serviceable. It will be completed and signed by an authorized inspector and remain with the unit. The completed form will be stored in Alta Avionics, LLC computer system.

5.35 Tag AA-LST (Locator/Status Tag)

This tag may be used to identify and/or locate parts or appliances. The Parts Inspector can attach this tag to parts or appliances to aid the technician in locating the item. When the tag is removed, it is destroyed.

5.36 Tag AA-RAS (Removed As Serviceable)

This tag is used to identify parts or appliances. The technician will complete, and attach this tag, to equipment removed during maintenance. It will remain attached to the equipment until reinstallation, and then destroyed.

5.37 Tag AA-REP (Repairable Equipment/Parts)

This tag is used to identify equipment/parts that are repairable. The technician and/or inspector will complete, and attach this tag, to equipment or parts that may be repairable. They will remain with the equipment/part until disposition, and then destroyed.

5.38 Tag AA-RFS (Repairable-For Storage)

This tag is used to identify items that are repairable, to be placed in storage. The technician and/or inspector will complete, and attach this tag, to repairable items that are going to be placed into storage awaiting repair. The tag will be removed and destroyed, when unit is repaired, and documented as serviceable.

5.39 Tag AA-RIT (Reject Item Tag)

This tag is placed on a rejected item. A technician and/or inspector will attach a properly completed tag to rejected parts. This tag will remain with the part and returned to the customer, or scrapped.

5.40 Tag AA-SLI (Shelf Life Item)

This tag will be attached to all shelf life items. This tag will be completed by the Parts Inspector, showing a Control #, and expiration date, and attached to each shelf life item. The tag will remain on each item until used, or disposed of.

5.41 Tag AA-ST (Scrap Tag)

This tag is placed on items to be scrapped. The technician and/or inspector will place a completed tag on parts/appliances to be scrapped. When the parts/appliances have been scrapped, and documented in the proper manner, the tag will be destroyed.

5.42 Format of Logbook Entries

There are multiple formats for logbook entries used by Alta Avionics, LLC They may be handwritten, or computer generated. They are completed and signed by an authorized inspector at the completion of work. They are given to the aircraft owner and will be stored in Alta Avionics, LLC computer system.

Examples of these forms can be found in the following sections

5.43 Satellite Facilities

All computer generated forms will have the option to select the appropriate facility. This will enable all forms to display the correct address and CRS#.

All non-computer generated forms that specify location or CRS number will have either all locations displayed or all CRS numbers displayed to comply with previous FAA accepted forms.

6.2.1 Instructions for Form Use : Autopilot Test

1. Enter the date of the work
2. Enter the Work Order number on which the work is being performed
3. Enter the Autopilot equipment specifics; Manufacturer, Model, and Serial Number
4. Equipment Operational characteristics;
 - a. Attitude Gyro; enter all performance parameters as tested
 - b. Heading Gyro; enter all performance parameters as tested
 - c. Left Turn and Bank; enter all performance parameters as tested
 - d. Right Turn and Bank; enter all performance parameters as tested
 - e. Heading DC; enter all performance parameters as tested
 - f. Heading AC; enter all performance parameters as tested
 - g. VOR intercept; enter an X for L and R to denote functional check accomplished
 - h. LOC intercept; enter an X for L and R to denote functional check accomplished
 - i. Pitch Up Angle; enter degrees as tested
 - j. Pitch Down Angle; enter degrees as tested
 - k. Altitude Hold Signal; enter values as tested
 - l. Versus Pitch Angle; enter values as tested
 - m. GS Inhibit (BC); enter an X to denote functional check accomplished
 - n. Speed and Scheduling; enter an X to denote functional check accomplished
 - o. Pitch Sync; enter an X to denote functional check accomplished
 - p. BC Operation; enter an X to denote functional check accomplished
 - q. Nav 1 / Nav 2 Select; enter an X to denote functional check accomplished
 - r. Auto Disconnect; enter an X to denote functional check accomplished
 - s. Autopilot Engage; enter an X to denote functional check accomplished
 - t. Remote Disconnect; enter an X to denote functional check accomplished
 - u. Self Test; enter an X to denote functional check accomplished

5. Flight Director Operational characteristics
 - a. Pitch Up; enter an X to denote functional check accomplished
 - b. Pitch Down; enter an X to denote functional check accomplished
 - c. Roll Left; enter an X to denote functional check accomplished
 - d. Roll Right; enter an X to denote functional check accomplished
 - e. Yaw Damp Signal Input; enter an X to denote functional check accomplished
 - f. Versus Output; enter an X to denote functional check accomplished
 - g. Engage; enter an X to denote functional check accomplished
 - h. Remote Disconnect; enter an X to denote functional check accomplished
 - i. Enter values as tested for Start Voltage, Speed, Torque, and Clutch Torque for;
 - i. Roll Servo
 - ii. Pitch Servo
 - iii. Yaw Servo
 - iv. Pitch Trim
 - v. Yaw Trim
6. Enter the name of the person performing the tests and functional checks
7. Enter the name of the person performing inspections of the work performed

NOTE: Not all fields always require text entry. Contact your supervisor if there are questions.
In cases where data is not required, DO NOT leave blank; enter N/A.

6.3.1 Instructions for Form Use : AA-LE-ATC-TMSI : Log Entry ATC Transponder and Mode S Inspection

- 1) Enter the date the work is performed
- 2) Enter the Work Order on which the work is being performed
- 3) Enter the aircraft registration number
- 4) Enter the aircraft Serial Number
- 5) Transponder #1 enter the name of the Manufacturer of the transponder
- 6) Transponder #1 enter the Model of the transponder
- 7) Transponder #1 enter the Part Number of the transponder
- 8) Transponder #1 enter the Serial Number of the transponder
- 9) Transponder #1; place an X in the boxes for each parameter for each corresponding test
- 10) Transponder #1; visually inspect the antenna in accordance with manufacturer's recommendations, place an X in the box to denote satisfactory results
- 11) Transponder #1; place an X in the System Pass box if all tests were satisfactory
- 12) Transponder #2 enter the name of the Manufacturer of the transponder
- 13) Transponder #2 enter the Model of the transponder
- 14) Transponder #2 enter the Part Number of the transponder
- 15) Transponder #2 enter the Serial Number of the transponder
- 16) Transponder #2; place an X in the boxes for each parameter for each corresponding test
- 17) Transponder #2; visually inspect the antenna in accordance with manufacturer's recommendations, place an X in the box to denote satisfactory results
- 18) Enter the name of the person performing the inspections and tests
- 19) Enter the test and inspection equipment Identification Number

NOTE: Not all fields always require text entry. Contact your supervisor if there are questions.
In cases where data is not required, DO NOT leave blank; enter N/A.

6.4 AA-ATCC : Aircraft Task Completion Checklist

AIRCRAFT TASK COMPLETION CHECKLIST

File this copy with the Work Order

*Date _____ *WO # _____ *A/C N _____ *A/C S/N _____
A/C TT _____
** NOTE: REQUIRED INFORMATION*

Final	I. Mechanical
	Aircraft walk-around (Pre-flight inspection plates)
	Radios and remote boxes latched tight
	Antennas in place and undamaged
	Controls free and clear
	Panel screws and fasteners tight and secure
	Control lock in place
	II. Tie-up
	All harnesses in place
	Appearance
	III. Operations
	Post lights, panel lights, and flood lights
	Pitot heat
	Radio readouts and displays
	IV. Radio and Instrument Checks
	P-T-T, marker lights
	Check all audio selections on panel speakers & phones
	COM—check squelch action, check on appropriate frequencies depending on location; #1 _____; #2 _____; #3 _____;
	Altimeter—check reading against field elevation, check barometric adjustment; #1 _____; #2 _____; #3 _____;
	Radar—check test, and returns if aircraft is outside and clear of obstructions
	Weather detection system operative - self test
	Radar altimeter—check test and DH. #1 _____; #2 _____;
	NAV – check on local frequencies, self-test, or Nav Tester #1 _____; #2 _____;
	Check digital display.
	DME – check on appropriate frequencies depending on location. #1 _____; #2 _____;
	RNAV – check on appropriate frequencies depending on location.
	ADF – less than seven seconds point, check all quadrants; check audio. #1 _____; #2 _____;
	(check on appropriate frequencies depending on location).
	Transponder – check test and reply light. #1 _____; #2 _____;
	TCAS self test.
	RMI – check operation of needles and heading card. #1 _____; #2 _____;
	H.S.I. – check slaving and NAV function. #1 _____; #2 _____;
	FMS #1 _____; #2 _____; #3 _____;
	EFIS/MFD - self test
	Glideslope – check on local frequencies, self-test, or Nav Tester. #1 _____; #2 _____;
	Autopilot 1) A/P Flight Director; engage; check left; right; up; down; manual; heading; course 1 & 2, needle 1 & 2, Altitude Hold, Yaw damp
	Check aircraft trim centering; roll, pitch & yaw
	Wheel switch checkout – Pilot and Co-Pilot
	Long-range NAV checkout; moving map & Annunciator functions (if applicable) #1 _____; #2 _____; #3 _____;
	Check vacuum (if applicable); L/H _____; R/H _____; STDBY _____;
	Static System Check; #1 _____; #2 _____; #3 _____; #4 _____;

Final	Attitude gyro switch (for applicable autopilots)
	CVR – self test
	GPWS – self test
	Other (describe):
	Circuit Breakers - checked and set
	V. Appearance
	Panel Paint, Interior as received, all loose items in A/C arranged as found
	“Do Not Fly” tag removed
	“Report Card” completed and attached
	Advise Maintenance Control of status / NAME:

**NWA – Not Working Area

Date _____

[illegible]

6.4.1 Instructions for Form Use : AA-ATCC : Aircraft Task Completion List

1. Enter Date the form is initiated.
2. Enter Work Order Number under which the installation was accomplished
3. Enter the aircraft Registration Number
4. Enter the aircraft Serial Number
5. Enter the total time (hours) on the aircraft, or the current reading on the tachometer, or Hobbs meter
6. Mechanical;
 - a. The scope of this inspection should be commensurate to the scope of the installation, and therefore may not entail every element or system identified on the Aircraft Task Completion Checklist
 - b. These Checklist Items are self explanatory; review and take the appropriate actions; contact supervisory personnel if a given item cannot be accomplished
 - c. Document all discrepancies noted on Work Order Traveler for customer or management disposition
7. Tie-up;
 - a. The scope of this inspection should be commensurate to the scope of the installation, and therefore may not entail every element or system identified on the Aircraft Task Completion Checklist
 - b. These Checklist Items are self explanatory; review and take the appropriate actions; contact supervisory personnel if a given item cannot be accomplished
 - c. Document all discrepancies noted on Work Order Traveler for customer or management disposition
8. Operations;
 - a. The scope of this inspection should be commensurate to the scope of the installation, and therefore may not entail every element or system identified on the Aircraft Task Completion Checklist
 - b. These Checklist Items are self explanatory; review and take the appropriate actions; contact supervisory personnel if a given item cannot be accomplished
 - c. Document all discrepancies noted on Work Order Traveler for customer or management disposition
9. Radio and Instrument Checks;
 - a. The scope of this inspection should be commensurate to the scope of the installation, and therefore may not entail every element or system identified on the Aircraft Task Completion Checklist
 - b. These Checklist Items are self explanatory; review and take the appropriate actions; contact supervisory personnel if a given item cannot be accomplished
 - c. Document all discrepancies noted on Work Order Traveler for customer or management disposition

10. Appearance;
 - a. The scope of this inspection should be commensurate to the scope of the installation, and therefore may not entail every element or system identified on the Aircraft Task Completion Checklist
 - b. These Checklist Items are self explanatory; review and take the appropriate actions; contact supervisory personnel if a given item cannot be accomplished
 - c. Document all discrepancies noted on Work Order Traveler for customer or management disposition
11. Enter the Initials of the technician or inspector accomplishing the checklist
12. Enter the Initials of the supervisor overseeing the accomplishment of the checklist
13. Enter the date the checklist was completed
14. Enter any comments or general observations made while completing the checklist

NOTE: Not all fields always require text entry. Contact your supervisor if there are questions. In cases where data is not required, DO NOT leave blank; enter N/A.

1. QUALITY ASSURANCE SYSTEM

	<u>YES</u>	<u>NO</u>	<u>N/A</u>
A. Is there an established Quality Assurance Program?	___	___	___
B. Does the Quality Assurance Manual describe the complete Quality Assurance Program?	___	___	___
C. Is the Quality Assurance Manual current?	___	___	___
D. Does the Quality Assurance Manual identify persons, by title, responsible for various functions and programs?			
1. Quality Program	___	___	___
2. Inspection	___	___	___
3. Calibration	___	___	___
4. Technical Data Control	___	___	___
5. Shelf Life Program	___	___	___
E. Does the Quality Assurance Manual identify back-up persons, by title, for the various functions and programs?	___	___	___
F. Is there a roster of:			
1. Persons authorized to perform calibrations, and:	___	___	___
2. A list of calibrations they are authorized to perform?	___	___	___
G. Is current technical data available, and used, by calibration technicians?	___	___	___
H. Are calibrations performed by only authorized persons?	___	___	___
I. If inspection stamps are used:			
1. Is the control of stamps described in the Quality Assurance Manual?	___	___	___
2. Does each stamp have a unique number to identify Each inspector?	___	___	___
J. Do inspectors have all necessary technical data, tools, and instruments available to inspect the calibration process?	___	___	___

Alta Avionics, LLC
Forms Manual (FM)

		YES	NO	N/A
2.	<u>TECHNICAL DATA</u>			
A.	Is there a documented system for obtaining technical data and maintaining it up to date?	___	___	___
B.	Is the appropriate, current technical data available to personnel that need it?	___	___	___
C.	Is there a system to prohibit hand entries or corrections to technical data?	___	___	___
3.	<u>TRAINING</u>			
A.	Does the facility have sufficient personnel with the necessary training, technical knowledge, and experience, for their assigned functions?	___	___	___
B.	Are training records:			
	1. Maintained on applicable personnel?	___	___	___
	2. Kept for two years after an employee leaves employment?	___	___	___
4.	<u>MEASURING AND TEST EQUIPMENT CALIBRATION (STANDARDS)</u>			
A.	Is there an established program to ensure the standards used are in current calibration, and traceable to the National Institute of Standards and Technology?	___	___	___
B.	Is there a procedure to prevent standards from being used that are out of calibration?	___	___	___
C.	Is there a listing showing the current calibration status of all calibration standards?	___	___	___
5.	<u>WORK PROCESSING</u>			
A.	Are all items to be calibrated properly identified?	___	___	___
B.	Are abnormalities from standard condition recorded?	___	___	___
C.	Are customers notified when suitability for calibration is in doubt?	___	___	___

Alta Avionics, LLC
Forms Manual (FM)

		YES	NO	N/A
	D. Is there a procedure before returning out of tolerance equipment to the customer?	___	___	___
6.	<u>RECORDS</u>			
	A. Are records maintained with sufficient information to permit the repeat of the calibration?	___	___	___
	B. Do these records include the names of personnel involved in the calibration process?	___	___	___
	C. Are all records, reports, certificates, safely stored and held secure, and in confidence to the customer, for a period of time specified in the Quality Assurance Manual?	___	___	___
7.	<u>FACILITIES</u>			
	A. Are the facilities such as to facilitate the proper performance of calibrations and verifications?	___	___	___
	B. Does the facility have the environmental conditions appropriate for the calibrations being conducted?	___	___	___
	C. Does the facility provide adequate security, and protection from fire?	___	___	___
	D. Are the security, fire protection systems, reviewed to assure they are adequate?	___	___	___
	E. Are operations conducted in a safe manner to avoid personnel injury and/or damage to customer property?	___	___	___
8.	<u>CERTIFICATES/REPORTS</u>			
	A. Are calibration certificates/reports issued with the following information:			
	1. Name/address of calibration facility?	___	___	___
	2. Name/address of customer?	___	___	___
	3. Identification of equipment calibrated?	___	___	___
	4. Characterization and condition of the calibration?	___	___	___
	5. Calibration date?	___	___	___
	6. Calibration procedure used?	___	___	___

Alta Avionics, LLC
Forms Manual (FM)

	YES	NO	N/A
7. Any deviation or exclusion from the calibration method?	___	___	___
8. Date of issue, and the person's signature and title, who accepted responsibility for the certificate or report content?	___	___	___
9. Special limitations of used?	___	___	___
10. Traceability to National Institute of Standards and Technology statement?	___	___	___
9. <u>SHIPPING</u>			
A. Are tools and/or test equipment returned to the customer in appropriate shipping containers, or one provided by the customer?	___	___	___
B. Are part, model, serial, and I.D. numbers recorded on calibration/report and shipping documents?	___	___	___
10. <u>SHELF LIFE PROGRAM</u>			
A. Is there a documented shelf life program?	___	___	___
B. Is there a listing of shelf life limited materials and/or parts, and their limits?	___	___	___
11. <u>ELECTROSTATIC DISCHARGE PROCEDURES (E.S.D.)</u>			
A. Is there an E.S.D. program/procedure to prevent damage to electrostatic discharge sensitive devices (E.S.D.S.)?	___	___	___
12. <u>DRUG/ALCOHOL</u>			
A. Attach copy of drug/alcohol program.	___	___	___
13. <u>REPAIR STATION</u>			
A. Attach copy of Repair Station Certificate, Operations Specifications.	___	___	___

6.9.1 Instructions for Form Use : AA-AUD-CVA : Calibrated Vendor Audit

Note: not all areas of the repair station are subject to all of the audit elements contained in this Audit Checklist.

Where audit elements are not applicable, place an X in the N/A column for that element.

1. Enter Vendor Company name
2. Enter Vendor address
3. Enter Vendor city
4. Enter Vendor State
5. Enter Vendor Zip Code
6. Annotate the particular division of the Vendor Company
7. Enter the Vendor telephone number
8. Enter the Vendor fax number
9. Enter the number of years the Vendor has been in operation at the specific location
10. Enter the number of employees maintained by the Vendor
11. Company Contacts;
 - a. Enter the name of the primary point of contact for Vendor Quality Control
 - b. Enter the phone number of the Quality Control contact
 - c. Enter the name of the primary point of contact for Vendor Inspection
 - d. Enter the phone number of the Inspection contact
12. Alta Avionics Audit Details
 - a. Enter Vendor Category
 - b. Enter an X on the appropriate line for Audit Type
 - c. Enter the recommended audit interval in months
 - d. Status;
 - e. Enter an X on the appropriate line for Acceptance, Conditional Acceptance, or Not Accepted
 - f. Circle one of the recommendations of Vendor status (approved vendor list); Add, Delete (remove), Update, Does not Qualify
 - g. Enter the date at which the next scheduled audit will take place
 - h. Auditor applies signature and date the form and audit are completed
13. Quality Assurance System; these audit element questions are self-explanatory, review and answer all audit element questions
14. Technical Data; these audit element questions are self-explanatory, review and answer all audit element questions

15. Training; these audit element questions are self-explanatory, review and answer all audit element questions
16. Measuring and Test Equipment Calibration (standards); these audit element questions are self-explanatory, review and answer all audit element questions
17. Work Processing; these audit element questions are self-explanatory, review and answer all audit element questions
18. Records; these audit element questions are self-explanatory, review and answer all audit element questions
19. Facilities; these audit element questions are self-explanatory, review and answer all audit element questions
20. Certificates and Reports; these audit element questions are self-explanatory, review and answer all audit element questions
21. Shipping; these audit element questions are self-explanatory, review and answer all audit element questions
22. Shelf Life Program; these audit element questions are self-explanatory, review and answer all audit element questions
23. Electrostatic Discharge Procedures; these audit element questions are self-explanatory, review and answer all audit element questions
24. Drug and Alcohol Program; these audit element questions are self-explanatory, review and answer all audit element questions
25. Repair Station; these audit element questions are self-explanatory, review and answer all audit element questions

NOTE: Not all fields always require text entry. Contact your supervisor if there are questions. In cases where data is not required, DO NOT leave blank; enter N/A.

A. Do employees thoroughly understand the ratings/limitations of the Alta Avionics Repair Station?	___	___	___
B. Do employees adhere closely to the Repair Station ratings/limitations?	___	___	___
C. Do employees consult a supervisor or inspector when questions arise concerning Repair Station ratings/limitations?	___	___	___
3. PERSONNEL QUALIFICATIONS, TRAINING:			
A. Are personnel properly trained for the functions they are to perform?	___	___	___
• Supervisors	___	___	___
• Inspectors	___	___	___
• Receiving/Shipping	___	___	___
• Technicians	___	___	___
B. Are training records maintained on all applicable personnel?	___	___	___
C. Is there a program where employees can get recurrent training?	___	___	___
D. Are qualifications monitored and upgraded through training as often as the schedule of work allows?	___	___	___
4. MANUALS AND AIRWORTHINESS DATA:			
A. Are all required manuals at hand or easily available to all the employees?	___	___	___
B. Are all manuals up to date or properly labeled as For Reference Only?	___	___	___

AA-AUD-IA (04-20)

Page 2 of 6

Alta Avionics, LLC
Forms Manual (FM)

	YES	NO	N/A
C. Are airworthiness records available to the employees?	___	___	___
D. Are drawings compiled from installation data for aircraft records? (Installation Dept)	___	___	___
E. Is there a system to prohibit hand entries or corrections to technical data?	___	___	___
5. SUPPLIER SELECTION APPROVAL AND SURVEILLANCE:			
A. Does parts/equipment orderer have access to a list of approved suppliers from whom they can order parts/equipment/materials/services?	___	___	___
B. Is purchased material cycled through an inspection process?	___	___	___
C. Is control maintained over procurement sources?	___	___	___
D. Does Alta Avionics have a system to approve suppliers?	___	___	___
6. PARTS AND MATERIALS HANDLING:			
A. Are parts/materials stored properly?	___	___	___
B. Is material protected from damage, deterioration, loss or substitution?	___	___	___
C. Has a secured area been set aside for storage of non-conforming or questionable material, including separation of received materials and marketable stock (radios, instruments, equipment, parts)?	___	___	___
D. Are aircraft parts stored separately from non aircraft parts?	___	___	___
E. Does the department adhere to the traceability and record keeping requirements for the distribution of these parts?	___	___	___

Alta Avionics, LLC
Forms Manual (FM)

	YES	NO	N/A
F. Is the department able to identify the individual parts and equipment suppliers?	___	___	___
G. Does the department follow acceptable packaging preservation procedures?	___	___	___
H. Does the department use adequate packaging or customers packaging when appropriate?	___	___	___
I. Are parts/materials properly identified?	___	___	___
J. Are parts which are susceptible to electrostatic discharge damage properly packaged, handled and stored?	___	___	___
7. INSPECTION AND QUALITY CONTROL:			
A. Is the department following quality control and inspection procedures written into the Repair Station and Quality Control Manual?	___	___	___
B. Are the inspectors properly trained?	___	___	___
C. Is the inspection roster available to all employees of the department?	___	___	___
D. Are all inspections for installation and repairs performed at the proper intervals?	___	___	___
E. If the department inspector is absent, do the employees' of the department know where to find the alternate inspector?	___	___	___
F. Are inspections properly documented?	___	___	___
G. Are inspections conducted by authorized personnel only?	___	___	___
H. Do inspectors have access to current data necessary to support an acceptable inspection process?	___	___	___

Alta Avionics, LLC
Forms Manual (FM)

	YES	NO	N/A
I. Do inspectors have access to the proper tools, gauges, instruments, and test equipment to properly inspect the characteristics of the product?	___	___	___
8. TOOL ADEQUACY AND CALIBRATION:			
A. Is all test equipment within the department marked with a CAL tag giving the CAL date, CAL due date, and CAL BY info?	___	___	___
B. Do the employees of the department, including department head, check the CAL dates on a regular basis?	___	___	___
C. Do the department supervisors know where the test equipment quarantine area is for test equipment found defective or out of CAL?	___	___	___
D. Is the test equipment properly cared for while in use or in storage?	___	___	___
E. Does the department have available to it all of the required test equipment for the range of jobs it performs?	___	___	___
F. Does the department have available to it all of the required tooling, crimpers, removal and insertion tools?	___	___	___
9. MAINTENANCE RELEASE PROCESS:			
A. Are all of the forms properly filled out for receiving an aircraft for an installation?	___	___	___
B. When the equipment or aircraft repair is completed, are the return to service forms properly filled out, and complete with all required inspections?	___	___	___
C. When outside work is required, are the proper maintenance releases received from them and documented?	___	___	___
10. DEFECT REPORTING:			
A. Are defects being reported when they occur in paperwork equipment, parts, or any process thereof?	___	___	___

Alta Avionics, LLC
Forms Manual (FM)

	<u>YES</u>	<u>NO</u>	<u>N/A</u>
11. RECORDS AND RECORD KEEPING PROCEDURES:			
A. Are records for the department for parts, repairs, and ongoing inspections being complied with as described in Alta Avionics, Inc. Repair Station Manual?	___	___	___
B. Are the above mentioned records being kept in storage for the required time?	___	___	___
C. Does each part have a traceability certificate that can be linked to an approved vendor?	___	___	___
D. Does Alta Avionics purchase records/sales order chain of custody lead to production approval holder (PMA, TSO, PC, TC, STC Holder) or manufacturer of standard parts?	___	___	___
E. Is serial number traceability maintained when applicable?	___	___	___
12. SHELF LIFE ITEMS:			
A. Does the department follow Alta Avionics documented shelf life program?	___	___	___
B. Are expired shelf life items properly disposed of?	___	___	___

6.10.1 Instructions for Form Use : AA-AUD-IA : Internal Audit

1. Enter the date of the Audit (scheduled or otherwise)
2. Enter the title of the Facility undergoing the Audit (e.g. Henderson, Apple Valley, etc.)
3. Enter the repair station certificate number
4. Enter the name of the department or area undergoing the Audit (e.g., Stock Room, Repaired Unit Storage Area, etc.)
5. Enter the name of the Supervisor responsible for the department or area undergoing the audit
6. Enter the name of the Auditor
7. Enter the typical interval or scheduled Audit Interval
8. Enter a brief description of Recommendations under which the Audit will be conducted
9. Facilities and Equipment; these audit element questions are self-explanatory, review and answer all audit element questions
10. Authority and Limitations and Actual Practices; these audit element questions are self-explanatory, review and answer all audit element questions
11. Personnel Qualifications and Training; these audit element questions are self-explanatory, review and answer all audit element questions
12. Manuals and Airworthiness Data; these audit element questions are self-explanatory, review and answer all audit element questions
13. Supplier Selection Approval and Surveillance; these audit element questions are self-explanatory, review and answer all audit element questions
14. Parts and Materials Handling; these audit element questions are self-explanatory, review and answer all audit element questions
15. Inspection and Quality Control; these audit element questions are self-explanatory, review and answer all audit element questions
16. Tool Adequacy and Calibration; these audit element questions are self-explanatory, review and answer all audit element questions
17. Maintenance Release Process; these audit element questions are self-explanatory, review and answer all audit element questions
18. Defect Reporting; these audit element questions are self-explanatory, review and answer all audit element questions
19. Records and Recordkeeping; these audit element questions are self-explanatory, review and answer all audit element questions
20. Shelf Life; these audit element questions are self-explanatory, review and answer all audit element questions

NOTE: Not all fields always require text entry. Contact your supervisor if there are questions. In cases where data is not required, DO NOT leave blank; enter N/A.

1. <u>QUALITY CONTROL SYSTEM</u>	<u>YES</u>	<u>NO</u>	<u>N/A</u>
A. Is there an established Quality Assurance Program?	___	___	___
B. Does the Quality Assurance Manual describe the complete Quality Program?	___	___	___
C. Is the Quality Assurance Manual current?	___	___	___
D. Does the manual identify persons, by title, responsible for various quality functions and programs?			
1. Quality Program	___	___	___
2. Inspection	___	___	___
3. Tool and Test Calibration	___	___	___
4. Technical Data Control	___	___	___
5. Shelf Life Program and Administration	___	___	___
E. Is the Quality Assurance Manual current?	___	___	___
F. Is there a roster of:			
1. Persons authorized to perform inspections:	___	___	___
2. A list of inspections they are authorized to perform?	___	___	___
G. Is current list of manufacturers who officially Authorize the distributor maintained?	___	___	___
H. Are inspections being performed to ensure a quality product or service?	___	___	___
I. Are inspections conducted by authorized personnel only?	___	___	___
J. Do the inspectors have access to current specifications necessary to support an acceptable inspection process?	___	___	___
K. Do inspectors have all necessary tools, gages and instruments available to inspect the characteristics of the product?	___	___	___

Alta Avionics, LLC
Forms Manual (FM)

		YES	NO	N/A
L.	If inspection stamps are used:			
1.	Is adequate control described in the quality manual, and is the control being enforced?	___	___	___
2.	Does each stamp have a unique number to identify each inspector?	___	___	___
3.	Is the stamp reissued when the Inspector leaves the position?	___	___	___
2.	<u>MEASURING AND TEST EQUIPMENT</u> (if applicable)			
A.	Is the calibration program detailed in the quality manual?	___	___	___
B.	Is there an effective calibration program, including a recall system, in effect?	___	___	___
C.	Are all precision tools/instruments, including personal tools, included in the calibration program?	___	___	___
D.	Do they have evidence of calibration?	___	___	___
E.	Are precision tools and instruments stored in a manner that will prevent damage or affect calibration?	___	___	___
F.	Are the calibration standards calibrated against instruments traceable to the National Institute of Standards and Technology?	___	___	___
G.	Is there a current certification for each standard?	___	___	___
3.	<u>TECHNICAL DATA</u>			
A.	Is there a documented system for obtaining technical data and maintaining it up to date? Note: Technical data includes any documents used to determine that the part complies with OEM requirements. Examples are, but are not limited to, drawings, manuals, parts, catalogs, and cross reference manuals.	___	___	___
B.	Is the appropriate, current technical data readily available to personnel that need it?	___	___	___
C.	Is there a system to prohibit hand entries or corrections to technical data?	___	___	___

Alta Avionics, LLC
Forms Manual (FM)

		YES	NO	N/A
4.	<u>RECORDS</u>			
A.	Does the vendor request adequate test and inspection records with each order of parts?	___	___	___
B.	Are certifications and test reports being received and filed as required?	___	___	___
C.	Can each part or carton or package of parts be linked to its certification and/or test records by some unique identifier?	___	___	___
D.	Does the vendor's purchase records/sales order chain of custody lead to production approval holder (PMA, TSO, PC, TC, STC Holder) or manufacturer of standard parts?	___	___	___
E.	Is the serial number traceability maintained when applicable?	___	___	___
F.	Are export Certificate of Airworthiness obtained for all foreign manufactured parts?	___	___	___
5.	<u>SHELF LIFE PROGRAM</u>			
A.	Is there a documented shelf life program?	___	___	___
B.	Is there a list of shelf life limited materials and parts and their limits	___	___	___
C.	Can the shelf life limit and status be readily identified on applicable material, parts, and assemblies?	___	___	___

Alta Avionics, LLC
Forms Manual (FM)

		YES	NO	N/A
6.	<u>TRAINING</u>			
A.	Are personnel properly trained for the functions they are to perform?			
	* Supervisors	___	___	___
	* Inspectors	___	___	___
	* Receiving/Shipping	___	___	___
	* Technicians	___	___	___
B.	Are training records maintained on all applicable personnel?	___	___	___
7.	<u>PROCUREMENT</u>			
A.	Is purchased material routed through receiving inspection?	___	___	___
B.	Is control maintained over procurement sources?	___	___	___
C.	Does the vendor have a list of suppliers from whom they procure their parts/materials/services?	___	___	___
D.	Does the vendor have a system to approve suppliers?	___	___	___
E.	Does the vendor have a system to monitor their rejects?	___	___	___
8.	<u>MATERIAL CONTROL</u>			
A.	Are parts/materials properly stored?	___	___	___
B.	Is material protected from damage, deterioration, loss or substitution?	___	___	___
C.	Is there evidence of proper action taken on non-conforming materials and are records retained?	___	___	___
D.	Is there a system for material review and rejection?	___	___	___
E.	Has a secured area been set aside for storage of non-conforming or questionable material including separation of received material and marketable stock?	___	___	___
F.	Are aircraft parts stored separately from non-aircraft parts?	___	___	___

Alta Avionics, LLC
Forms Manual (FM)

		<u>YES</u>	<u>NO</u>	<u>N/A</u>
G.	Does the vendor maintain traceability and total batch/lot segregation, and are records kept on the distribution of those parts?	___	___	___
H.	Does the vendor have a system to identify parts source?	___	___	___
I.	Does the vendor follow acceptable preservation procedures?	___	___	___
J.	Does the vendor use adequate packaging or customer's specified packaging when appropriate?	___	___	___
K.	Are parts/materials properly identified?	___	___	___
L.	Are parts which are susceptible to electrostatic discharge damage properly packaged, handled and stored?	___	___	___
9.	<u>HOUSING AND FACILITIES</u>			
A.	Is ventilation, lighting, temperature, and humidity control adequate?	___	___	___
B.	Are good housekeeping procedures being maintained?	___	___	___
10.	<u>CERTIFIED REPAIR STATION</u>			
A.	Is your company a certified repair station?	___	___	___
B.	Please attach a copy of the Repair Station Certificate	___	___	___
11.	<u>DRUG & ALCOHOL POLICY</u>			
A.	Is there a Drug & Alcohol Policy in place?	___	___	___
B.	Please attach a copy of the Drug and Alcohol Program.	___	___	___

NOTES:

6.11.1 Instructions for Form Use : AA-AUD-VA : Vendor Audit

Note: not all areas of the repair station are subject to all of the audit elements contained in this Audit Checklist. Where audit elements are not applicable, place an X in the N/A column for that element.

1. Enter Distributor Company name
2. Enter Distributor address
3. Enter Distributor city
4. Enter Distributor State
5. Enter Distributor Zip Code
6. Annotate the particular division of the Distributor Company
7. Enter the Distributor telephone number
8. Enter the Distributor fax number
9. Enter the number of years the Distributor has been in operation at the specific location
10. Enter the number of employees maintained by the Distributor
11. Company Contacts;
 - a. Enter the name of the primary point of contact for Distributor Quality Control
 - b. Enter the phone number of the Quality Control contact
 - c. Enter the name of the primary point of contact for Distributor Inspection
 - d. Enter the phone number of the Inspection contact
 - e. Enter the name of the primary point of contact for Distributor Material Control
 - f. Enter the phone number of the Material Control contact
12. Alta Avionics Audit Details
 - a. Enter Distributor Category
 - b. Enter an X on the appropriate line for Audit Type
 - c. Enter the recommended audit interval in months
 - d. Status;
 - i. Enter an X on the appropriate line for Acceptance, Conditional Acceptance, or Not Accepted
 - e. Circle one of the recommendations of Distributor status (approved vendor list); Add, Delete (remove), Update, Does not Qualify
 - f. Enter the date at which the next scheduled audit will take place
 - g. Auditor applies signature and date the form and audit are completed
13. Quality Control System; these audit element questions are self-explanatory, review and answer all audit element questions

14. Measuring and Test Equipment Calibration (standards); these audit element questions are self-explanatory, review and answer all audit element questions
15. Technical Data; these audit element questions are self-explanatory, review and answer all audit element questions
16. Records; these audit element questions are self-explanatory, review and answer all audit

6.12 AA-CC : Certificate of Calibration

**Alta Avionics, Inc.
Certificate of Calibration**

Manufacturer: _____
Model: _____
Description: _____
Serial Number: _____
Customer: _____
Work Order: _____

Calibration Procedure: _____
Environmental Conditions: _____

Remarks: _____

This Unit was Received ☐ In Specification ☐ Out of Specification

This certificate attests that this instrument has been calibrated under the stated conditions with standards that are traceable to the National Institute of Standards and Technology (NIST) or derived from accepted values of natural physical constants or derived by ratio type of self-calibration. Evidence of traceability is available and on file at our Facility.

Standards Utilized for this Calibration

Equip. ID	Manufacturer	Model	Serial Number	Due Date

Calibration Date: _____

Calibration Due: _____

Calibrated By

CRS# 7AYR463B
1887 SOUTH 1800 WEST
Woods Cross, UT 84087

6.12.1 Instructions for Form Use : Certificate of Calibration

1. Enter the name of the manufacturer for the unit being calibrated
2. Enter the model number of the unit being calibrated
3. Enter a description (nomenclature) of the unit being calibrated
4. Enter the serial number of the unit being calibrated
5. Enter the name of the customer who submitted the unit to be calibrated
6. Enter the work order number on which the work is being performed
7. Enter a description of the calibration procedures applicable to the unit being calibrated
8. Enter a description of the environmental conditions at the time the unit was being calibrated
9. Enter remarks pertaining to the unit being calibrated
10. Annotate in the boxes provided, the status the unit was found to be upon arrival
11. List all equipment and standards used to accomplish the calibration
12. Enter the date the calibration was completed
13. Enter the next calibration due date, based on the interval prescribed for the unit being calibrated
14. Enter the name of the person who performed the calibration

NOTE: Not all fields always require text entry. Contact your supervisor if there are questions. In cases where data is not required, DO NOT leave blank; enter N/A.

6.13 AA-CLSE : Capabilities List Self-Evaluation

Alta Avionics, LLC
Capabilities List Self-Evaluation Form

Description of
desired capability:

Facility:

1. Repair station: CRS# 7AYR463B, 1887 SOUTH 1800 WEST, Woods Cross, UT 84087
2. Are there adequate housing and facilities for desired capability?

☐ YES ☐ NO

Describe housing facility
for desired capability:

Requirements:

1. Does the desired facility possess the proper tools needed for this capability?

☐ YES ☐ NO

Description of Tools
needed:

2. Does the desired facility possess the proper equipment and materials needed for the capability?

☐ YES ☐ NO

Description of Tools
needed:

*in the case of using equivalents, please specify.

3. Does the repair station have the proper technical data and processes?

☐ YES ☐ NO

Description of technical
data and source for data:

4. Does the repair station have properly trained personnel?

☐ YES ☐ NO

Repair Station Acceptance: _____ Date: _____

6.13.1 Instructions for Form Use : AA-CLSE : Capabilities List Self-Evaluation

1. Enter a description of the capability sought Facility;
 - a. The repair station with managerial control of its satellite repair stations must hold the capability prior to that capability being held by a satellite repair station
 - b. Select Yes or No, regarding housing and facilities
 - c. Describe the housing and facilities which are required to support the added capability
2. Requirements;
 - a. Select Yes or No, regarding the possession of proper tooling
 - i. Describe the type of tooling required
 - b. Select Yes or No, regarding the possession of proper equipment and materials
 - i. Describe the type of equipment and materials required
 - c. Select Yes or No, regarding the possession of the proper technical data required
 - i. Describe the type of technical data required
 - d. Select Yes or No, regarding the repair station employee for proper training
 - i. Describe the type of training required
3. Acceptance;
 - a. Provide the completed form to the Quality Assurance Manager
 - i. The Quality Assurance Manager will sign and date the form, and present to the President for final acceptance

NOTE: Not all fields always require text entry. Contact your supervisor if there are questions. In cases where data is not required, DO NOT leave blank; enter N/A.

6.15.1 Instructions for Form Use : AA- ECTCR : Electromagnetic Compatibility Test Completion Record

1. Enter the name of the person or company for whom this Compatibility Test is being accomplished
2. Enter the Work Order number on which this Compatibility Test is being accomplished
3. Enter the nomenclature (name) of the system, unit, aircraft for which this Compatibility Test is being accomplished
4. Enter the model and part number of the system, unit, aircraft for which this Compatibility Test is being accomplished
5. Enter the Identification number of the system, unit, aircraft for which this Compatibility Test is being accomplished
6. Enter the date on which this Compatibility Test is to begin
7. Enter the date on which this Compatibility Test is to be completed
8. Enter the name of the engineer or qualified person who is conducting this Compatibility Test
9. Enter the date of completion of the test
10. Enter the name of the Quality Assurance representative overseeing this Compatibility Test
11. Enter the date of acceptance by Quality Assurance of the test

NOTE: Not all fields always require text entry. Contact your supervisor if there are questions. In cases where data is not required, DO NOT leave blank; enter N/A.

6.16 AA-ETR : Employee Training Record

CRS# 7AYR463B
1887 SOUTH 1800 WEST
Woods Cross, UT 84087

Employee Training Record

Employee Name	
Certificate Number (Repairman)	
Type of Training	
Method of Training (Classroom, Factory, OJT, ETC.)	
Length of Training (Hours)	
Location of Training	
Name of Instructor	
Date of Training	
Qualified	
Employee Signature	
Supervisor's Signature	
Training Records	Date: _____ BY: _____

6.16.1 Instructions for Form Use : AA-ETR : Employee Training Record

1. Enter the full name of the Employee
2. Enter the Certificate number (A, P, A/P, Repairman, etc.)
3. Enter the type of training (e.g. OJT, Classroom, Distant, etc.)
4. Enter the duration/length of training, in hours
5. Enter the location of training (organization, facility, factory, etc.)
6. Enter the name of the qualified instructor
7. Enter the date the training occurred (the day it was completed)
8. Enter Yes, or No, denoting whether the training was successful to establish proficiency in the skill being trained
9. Apply Employee signature to the completed form
10. Apply Supervisor's signature to the completed form
11. Enter the date on which the employee Training Records were updated
12. Enter the name of the person updating the employee Training Records

NOTE: Not all fields always require text entry. Contact your supervisor if there are questions. In cases where data is not required, DO NOT leave blank; enter N/A.

Alta Avionics, LLC
Forms Manual (FM)

6.17 AA-IICL : Installation Inspection Checklist

INSTALLATION INSPECTION CHECKLIST

Date _____ WO # _____ N # _____ Lead Technician _____

The Lead Installation Technician and Installation Dept. Supervisor will be present for installation steps planning. The Lead Installation Technician is responsible for reviewing every detail of this document, & reporting any problems to the Installation Dept. Supervisor.

Initial block for each item when completed.

Pre-Aircraft Arrival:

1.		Obtain copies of Work Order & Installation Proposal with explicit details of installation.
2.		Inventory all parts & equipment required for the installation (if possible). Group them in your area. Verify equipment installation kits are complete. Notify Installation Dept. Supervisor of any shortages.
3.		Verify proper Airworthiness Documentation exists for all equipment.
4.		Gather appropriate installation data: Manufacturers installation instructions, aircraft wiring diagrams, DER engineering prints, etc.
5.		Verify currency and latest revision of all manuals used for the installation.
6.		Verify proper tooling & materials for the installation is readily available.
7.		Gather preliminary data for FAA Form 337 (if required) & forward to FAA Coord.

Preliminary Inspection: (Mark N/A in block if item is not applicable)

1.		Obtain copies of current W&B, Equipment List, & Aircraft Registration. Record Aircraft Flight Manual Part No., Revision No., & Date (if required).
2.		Check logbook entries for FAR 91.411 & 91.413 (if possible). Note dates nearing expiration or past due.
3.		Note aircraft voltage: _____.
4.		Aircraft walk-around. Look for loose or missing fasteners. Inspect exterior windows & paint for scratches & defects. Inspect static wicks, pitot mast, static ports, & antennas for airworthiness.
5.		Aircraft interior inspection. Inspect cabin doorway, upholstery, seats, carpet, trim, & headliner for condition.
6.		Instrument panel inspection. Inspect panels for security of mounting, scratches & defects, loose switches & instruments. Check glare shield for security & condition.
7.		Flight Controls inspection. Pull controls through full range of travel, note any interference, binding, & noises.

Alta Avionics, LLC
Forms Manual (FM)

8.		Avionics stack inspection. Inspect existing equipment for security of mounting & appearance. Inspect rack mountings for back-support structure.
9.		Lighting inspection. Inspect all panel, instrument, flood, and radio lighting. Inspect all cabin lighting (reading, map, courtesy, passenger, etc.). Inspect all external lighting (beacons, strobes, taxi/landing, navigation, ice, etc.).
10.		Check Pitot & Static heat for operation.
11.		Check all avionics displays for operation & readability. Check photocells.
12.		Annunciators' inspection. Push to test (if possible) all annunciators, including Marker lights. Check day/night switches where applicable.
13.		Audio inspection. Check all audio selections at audio panel (speakers & phones). Check intercom system at each headset location. Check ANR system operation. Check headset jacks for airworthiness. Check avionics annunciation tones, alerts & warning audio where applicable.
14.		Communications inspection. At each Com, check squelch action, call shop for radio check, or check using local frequencies. Check remote switches.
15.		VHF Nav inspection. At each Nav, ground test using local frequencies, or ramp tester as applicable. Check operation of corresponding indicators.
16.		DME inspection. At each DME, check using local frequencies, or ramp tester as applicable. Check operation of remote switches & indicators. Check remote Nav tuning where applicable.
17.		RNAV inspection. Check using appropriate frequencies.
18.		ADF inspection. At each ADF, check using appropriate frequencies. Check operation of corresponding indicators.
19.		Transponder inspection. At each transponder, check test & reply lights. Ground test using ramp tester (when practical). Check encoding (when practical). Check operation of remote ident, transponder/encoder 1-2 switch, & standby switches where applicable.
20.		RMI inspection. At each RMI, check operation of needles and heading card.
21.		H.S.I. Inspection. At each H.S.I., check slaving & Nav function. Check operation of Nav switching system where applicable.
22.		Glideslope inspection. At each Glideslope, ground test using local frequencies, or ramp tester as applicable. Check operation of corresponding indicators.
23.		GPS inspection. At each GPS, check for correct position data (when practical). Check Moving Map, display, & Annunciators functions where applicable. Check database revision & currency.
24.		Gyro inspection. Check for proper operation & system suction (when practical).
25.		Autopilot/Flight Director inspection. Engage, check left/right, up/down, manual, heading, course 1 & 2, back course 1 & 2, needle 1 & 2, altitude hold, & yaw damper as applicable. Check operation of remote switches, annunciators, & tones.
26.		Altimeter inspection. At each altimeter, check reading against field elevation. Check encoding (when practical).
27.		Rad-Alt inspection. Check test and DH. Check operation of remote switches & annunciators as applicable.
28.		Radar inspection. Check test. Check returns if aircraft is outside & clear of obstructions.

Alta Avionics, LLC
Forms Manual (FM)

29.		Weather Detection System inspection. Check self test functions. Check system for RF interference (if required).
30.		EFIS/MFD inspection. At each unit, check self-test functions. Check display & annunciator functions where applicable.
31.		TCAS inspection. Check self test functions. Verify proper display at MFD, or other.
32.		TAWS inspection. Check self test functions. Verify proper display at MFD, or other.
33.		Trim inspection. Check operation of electric & manual trim systems.
34.		Static system inspection. At each Pitot/Static system, check system for leaks, security, and operation (when practical).
35.		Circuit breakers inspection. Check breakers for security of mounting, placards, & condition of panel.
36.		Inspect forward & aft avionics bays for available mounting space & accessibility of wiring harnesses as applicable.
37.		Note physical layout of existing avionics, familiarize yourself with how the systems are interconnected. Make sketch or take digital photos (if required).
38.		Inspect aircraft for available antenna mounting space. Perform Skin-Mapping procedure (if required).
39.		List (in detail) all discrepancies noted up to this point.
40.		Enter initials in Preliminary Inspection block, on Work Traveler (k-03.2).

Installation / In-progress Inspection: (Mark N/A in block if item is not applicable)

1.		Install protective covers on seats, floors, & carpet. Install plastic, protective film around all exterior-working areas that may be subject to damage. Clear aircraft of clutter, trash, etc. Gather owner/operators personal belongings and secure them, in an orderly fashion, in an appropriate holding area.
2.		Open up working areas in aircraft (panels, floor boards, etc.), & check for conflicts in mounting parts/equipment. Check harness routes. Make notes.
3.		Review labor figures on Installation Proposal, decide if more labor needs to be approved at this point. Make notes.
4.		Review all notes & Pre-Installation Inspection discrepancies with Installation Dept. Supervisor. Assist with generating Change Orders, additional Work Order tasks, etc.
5.		Gather necessary data & initiate FAA Form 337 paperwork (if required).
6.		Tag any removed equipment using form KA-17 (Removed As Serviceable), and secure in equipment holding cabinet.
7.		Pre-fabricate, mark, and test wiring harnesses on bench as much as possible for new equipment. Use a Parts Charge Out sheet & begin listing all misc. parts, wire, & supplies used during the installation.
8.		Install & interface new equipment wiring harnesses, cables, terminals & connectors in aircraft.
9.		Install proper circuit protection for new equipment and placard appropriately.

Alta Avionics, LLC
Forms Manual (FM)

10.		Contact Installation Dept. Supervisor for an In-Progress Inspection, at this point before proceeding. Verify that the inspecting Technicians initials are entered in the In-Progress Inspection block on Work Traveler (K-03.2).
11.		Perform continuity checks of all new wiring/interfaces before applying power to aircraft.
12.		Plug on equipment & perform power-on & functional checks of all systems (as practical) prior to harness tie-up and rack mounting.
13.		Install new equipment racks, mounting trays, brackets, etc. using new aircraft hardware.
14.		Tie-up all harnesses. Install any anchors, tywrap mounts, etc. if needed. Make sure to use grommets, or anti-chaff materials where airframe to harness contact may be suspected. Check flight controls for full-unobstructed travel.
15.		Install new equipment in aircraft. Thoroughly clean all aircraft working areas of debris, sheet metal shavings, trash, etc..
16.		Contact Installation Dept. Supervisor for another In-Progress Inspection, at this point before proceeding. Verify that the inspecting Technicians initials are entered in the second In-Progress Inspection block on Work Traveler (K-03.2).
17.		Correct any discrepancies found during In-Progress Inspection. Note changes that may effect Form 337.
18.		Ensure that all affected systems have been successfully configured, tested & are working properly.
19.		Reassemble working areas, close access panels only after inspector's examination. Check seat rails and locks for security (whether you removed them or not).
20.		Verify that all work has been completed per FAA Form 337, &/or STC, & that any necessary placards have been properly installed.
21.		Take a moment to account for all tools & supplies.
22.		Verify that all misc. parts, supplies, wire, etc, are listed on the Parts Charge Out sheet.
23.		Vacuum carpets, arrange seats & seatbelts in a presentable fashion. Return owner/operators belongings to aircraft.
24.		Review all Work Order tasks & Change Orders. Verify that aircraft is ready for final inspection.
25.		Clean shop and bench areas in accordance with good housekeeping practices.

Final Inspection / Sign-off: (Mark N/A in block if item is not applicable)

1.		Update W&B & Equipment List. Install new revision into POH (if possible).
2.		FAA Form 337 completed and mailed to SLC FSDO.
3.		Airframe Logbook entries completed.
4.		All airworthiness documentation, Pilot Guides, Warranty data, placed inside aircraft.
5.		Aircraft approved for return to service by authorized personnel.

Technician Initials _____ Supervisor Initials _____ Date _____

6.17.1 Instructions for Form Use : AA-IIC : Installation Inspection Checklist

1. Enter Date installation is to commence
2. Enter Work Order Number under which the installation will be accomplished
3. Enter the aircraft Registration Number
4. Enter the full name of the Lead Technician
5. Pre-Arrival;
 - a. These Checklist Items are self-explanatory; review and take the appropriate actions; contact supervisory personnel if a given item cannot be accomplished
6. Preliminary Inspection;
 - a. The scope of this inspection should be commensurate to the scope of the intended installation, and therefore may not entail every element or system identified on the Installation Checklist
 - b. These Checklist Items are self-explanatory; review and take the appropriate actions; contact supervisory personnel if a given item cannot be accomplished
 - c. Document all discrepancies noted during the Preliminary Inspection, on Work Order Traveler for customer disposition
7. Installation / In-progress Inspection, is an ongoing process, and should be accomplished at intervals and points throughout the installation process, depending on the scope of the installation;
 - a. The scope of this inspection should be commensurate to the scope of the intended installation, and therefore may not entail every element or system identified on the Installation Checklist
 - b. These Checklist Items are self-explanatory; review and take the appropriate actions; contact supervisory personnel if a given item cannot be accomplished
 - c. Document all discrepancies noted during the Preliminary Inspection, on Work Order Traveler for customer or management disposition
8. Final Inspection / Sign-off;
 - a. These Checklist Items are self-explanatory; review and take the appropriate actions; contact supervisory personnel if a given item cannot be accomplished
 - b. Review items gathered in the Pre-Arrival process, and ensure all documentation pertaining and relevant to the aircraft are provided to the operator

NOTE: Not all fields always require text entry. Contact your supervisor if there are questions. In cases where data is not required, DO NOT leave blank; enter N/A.

Alta Avionics, LLC, 1887 S 1800 W, WOODS CROSS, UT CRS: 7AYR463B **FORM AA-LE-ATI(40-20)**

6.19.1 Instructions for Form Use : AA-LE-ATI : Altimeter Tests and Inspections

1. Enter an X in the box, if appropriate, denoting compliance with Appendix E & F of 14 CFR 43, as required by 14 CFR 91 §91.411
2. Enter an X in the box, if appropriate, denoting compliance with Appendix F of 14 CFR 43, as required by 14 CFR 91 §91.413
3. Static System Leak Check;
 - a. Enter the altitude, in feet, a given system is tested to
4. Location Performed; enter the airport identifier where the work was performed as the location
5. Equipment Identification;
 - a. For all installed equipment comprising the pitot/static/transponder system;
 - b. Enter the Manufacturer's name
 - c. Enter the Manufacturer's Model Number
 - d. Enter the Manufacturer's Part Number
 - e. Enter the Manufacturer's Serial Number
 - f. Enter the value (in feet above sea level) the individual equipage was tested
6. Enter the Work Order number under which the tests and inspections are being performed
7. Enter the aircraft Manufacturer's Model Number
8. Enter the aircraft Manufacturer's Serial Number
9. Enter the aircraft registration number
10. Enter the aircraft Hobbs (hour) Meter time
11. Enter the aircraft tachometer (hours) time
12. Enter comments regarding the performance or functionality, as needed
13. Apply the signature of the person authorized to perform the tests and inspections, and return for service
14. Enter the date on which the tests and inspections were completed

NOTE: Not all fields always require text entry. Contact your supervisor if there are questions. In cases where data is not required, DO NOT leave blank; enter N/A.

Tested By

6.23.1 Instructions for Form Use : AA-RT : Radar Test

1. Enter the date on which the RADAR test is being performed
2. Enter the Manufacturer's name of the RADAR unit being tested
3. Enter the Work Order number under which the RADAR Test is being performed
4. Enter the Indicator;
 - a. Model number
 - b. Serial Number
 - c. Part Number
5. Enter the RT;
 - a. Model number
 - b. Serial Number
 - c. Part Number
6. Enter the Antenna;
 - a. Model number
 - b. Serial Number
 - c. Part Number
7. Performance Checks;
 - a. Place an X in the 'OK' check box, for all functional checks which passed the manufacturer's required performance parameters
 - b. Leave check boxes blank for those functional checks which did NOT pass the manufacturer's required performance parameters
 - i. Transfer all failed performance parameters to the Work Traveler for further action
8. Enter the name of the person performing the functional checks in section 7, above

NOTE: Not all fields always require text entry. Contact your supervisor if there are questions. In cases where data is not required, DO NOT leave blank; enter N/A.

6.25.1 Instructions for Form Use : AA-SPL : Scrapped Parts Log

Note: Use of this form is required only for aeronautical articles which are affected by 14 CFR 43, §43.10; Disposition of Life-Limited Aircraft Parts. Life Limited aircraft parts, are those parts for which the holder of a type design (aircraft, appliances, TSO articles, engines). Parts and aeronautical articles which are not subject to §43.10, may be discarded without retaining a record, unless otherwise directed by an aircraft operator.

1. Enter a Description of the Scrapped Part
2. Enter the Manufacturer's Part Number
3. Enter the Manufacturer's Serial Number
4. Enter the name of the person performing the scrapping or mutilation operation
5. Enter the name of the person who verified the part was rendered beyond use
6. Enter the date on which the part was scrapped
7. Enter the Work Order Number under which the part was removed from service and scrapped

NOTE: Not all fields always require text entry. Contact your supervisor if there are questions. In cases where data is not required, DO NOT leave blank; enter N/A.
